

ULTRA-GLO

Single-Stage Urethane

- LONG-LASTING DURABILITY, WITH EXCELLENT GLOSS
- AVAILABLE IN 65 STOCK FACTORY-PACK COLORS
- MIXES 3:1 WITH UA-1600 ACTIVATOR, OR 3:1:1 WITH ACTIVATOR AND STABILIZER/CONVERTER (UA-2400)
- NATIONAL RULE COMPLIANT

ULTRA-GLO Single-Stage Urethane Topcoats offer a premium-quality finish at minimal cost. This high-gloss, ultra-durable paint is designed for automotive and fleet refinishing, or anytime a top-of-the-line finish is required. Kirker's most advanced single-stage topcoat system provides a high degree of UV protection to keep vehicles looking glossy and deep in color for years. ULTRA-GLO provides serious resistance to dangerous chemicals, everyday weathering and aggravating stone chips.

This acrylic urethane system can be used in single-stage applications, or in combination with a clearcoat for added durability. Using the ULTRA-LOCK Metallic Control Additive/Basecoat Stabilizer (UA-2400) helps improve sprayability and ease-of-use, thanks to anti-mottle technology that stabilizes metallics and pearls, locking them in place for an even, streak-free finish.

Refer to Technical Data Sheet (available online) for more specific mixing and application directions.

ULTRA-GLO

Single-Stage Urethane

From cool classics to the most modern metallics, Kirker's ULTRA-GLO line has a color for just about every application. And by blending different colors, adding Diamond Pearl Series midcoats or topcoating with the SPECTRA Series urethane candies, there's no limit to the color pallet available.
